Criteria for Fixation and Revision of Fee

The school has maintained a nominal fee structure since its inception, in accordance with its foundational principles as a non-profit educational institution. Committed to provide quality education to all students, especially those from rural and economically diverse backgrounds, the management prioritizes affordability and accessibility in framing the fee structure. The process of fee fixation and revision is transparent and consultative, beginning with discussions in the Parent Teacher Association (PTA) to gather suggestions, followed by the discussions in the School Managing Committee (SMC). Any revision is made after carefully considering academic needs, co-curricular and extracurricular programmes, infrastructure development, and overall student support services. The final fee structure is approved by the School Management that reflects the ongoing commitment of the institution to deliver quality education at a cost that is reasonable and accessible to students from all economic backgrounds.
